# GABRIEL BOCCHINI

---

**[Short Bio]** Professional with 2,5 years of experience as Product Owner with Agile, Scrum and Kanban methodologies + 3 years in programming with Python, Django, Django Rest FM, Flask, Beautiful Soup, Pandas, NumPy, SciKit-Learn, PostgreSQL, MongoDB, DynamoDB AWS, AWS S3, AWS API Gateway, DigitalOcean, Heroku, GIT, TravisCI, Trello, Jenkins.

**[Looking for]** Full time job as Python developer, preferably remote, available and willing to work on different time zones and with multidisciplinary and multi-cultural teams.

**[My top skills are]** Python, Django, Flask, Kanban and Product Ownership.

**[What you can expect]** Resilience, maturity, seriousness, team play, customer facing experience, ability to deliver with little supervision, an eager to learn, explore and share.

## EXPERIENCE

### Python Developer @ Lojasparaguai.com.br

Freelance 2019

- Refactoring of the scraping bots from Java to Python3 with Async techniques and threading capabilities;

**[Technologies used]** Python, Beautiful Soup, Selenium, MongoDB, DigitalOcean. **Cost decrease** of 15% in infrastructure in the first 30 days].

### Product Owner/Python Developer @ Frontur.tur.br

2014 - 2019

- Backlog control and prioritization;
- Stakeholders meetings and presentations;
- A lot of testing (by hand and using Selenium);
- Bug reports/ticketing prioritization;

- New opportunities and website enhancement based on latest statistics/user feedback;
- Support to the sales team on operational/commercial matters related to the company e-commerce and internal legacy systems;
- Planning with the Marketing and advertising Team online advertisement campaigns;
- Implementation and control of online advertising (AdWords, BingAds, Google Display Network, etc)
- Analysis of KPIs and report on online advertising campaigns to Directory and Marketing Team;

[**As product owner** I've been in 5 main projects from scratch: legacy CRM, company website, internal portal (intranet), honeymooners special portal and company mobile apps. Took the website from none/0 sales, reformulated it with the dev team and went up to about U\$10k per month in sales].

[**As Python developer**, I've built a landing pages system for the marketing department, a quotations control system for the travel agents (80-100 daily users) and a honeymooners portal with integrated payments, custom page generation, etc ].

[**Technologies used** Python, Django, Postgre, Bootstrap 4, AWS S3, Heroku and DigitalOcean].

### **Travel Consultant @ Frontur.tur.br**

2010-2014

- Clients prospection;
- Air, hotel, private services reservations (corporate and leisure
- travel - **overseas only**)

[Average U\$ 80k in sales per month with a 13% markup]

[Heavy Amadeus GDS user]

### **Congresses and Fairs agent @ Naipi Congresses and Fairs Operator**

2008 - 2010

- Clients prospection;
- air, hotel and transfers reservations for congresses/fairs attendants overseas and corporate accounts;

## Ecomuseum Tour Guide // Translator-interpreter @ Itaipu.gov.br

2002 - 2005

- Environmental education for local community and students;
- Guiding (mainly foreign) EcoMuseum visitors;
- Translation/Interpretation on lectures and eventual business meetings.
